

EMPLOYMENT

Senior Analyst	The Home Depot	Apr. 2024 - Present
- Developed a new OKR tracking system, centralizing all OKRs into a BigQuery-driven reporting layer with automated daily updates. Built a Tableau dashboard for trend and target analysis, enabling granular breakdowns and enhanced visibility. Earned praise from senior leadership: “The best OKR dashboard I’ve seen in any position I’ve held.” - Led an \$81.2M inventory reduction initiative, delivering a national-scale analysis in 4 days vs. an initially estimated 3-months. Partnered with Directors/VPs to refine targeting criteria and developed a daily tracking system, enabling action on ~400k SKU-stores. - Automated New Store Opening Process, eliminating ~150 hours of manual work per store by replacing error-prone Excel and email workflows with a fully automated SQL, Python, and Smartsheet API pipeline. Built and deployed independently in 2 months, scaling the process for FY25 growth. Received a Homer Award for this achievement. - Designed and deployed ad-hoc analyses for merchandising products and strategies, including system promotion stacking, assortment alignment, and pilot performance, influencing pricing and allocation decisions at the enterprise level. - Streamlined ticket intake, reducing intake processing time from ~20 minutes to ~3 seconds utilizing Jira API and Power Automate, enhancing operational efficiency and providing greater control and customization over issue tracking. - Mentored and trained internal merchandising teams on SQL and BigQuery, developing curriculum materials, conducting optimization workshops, and fostering a culture of data-driven decision-making.		

Consultant & Data Analyst	CompliancePoint	Apr. 2022 – Apr. 2024
- Analyzed 29M+ marketing calls per month, utilizing SQL Server, Python, and Power Query. - Conducted an analysis of over 300 million affiliate clicks in response to a Federal Trade Commission inquiry leveraging Python (Pandas, Matplotlib). - Automated PDF-to-structured-data conversion, saving 315+ hours of manual work for a public client. - Optimized clients’ marketing outreach strategies to reduce overhead and ensure federal and state regulatory compliance via analysis of key dialing metrics. - Independently presented my insights to internal and external leadership across client accounts and industries, directly supporting companies’ decision-making processes.		

EDUCATION

Tallahassee, FL	Florida State University	Aug. 2017 – Apr. 2021
Degrees		
Bachelor of Science in Management Information Systems		
Bachelor of Science in Accounting		
GPA: 3.6 / 4.0		

TECHNICAL EXPERIENCE

Projects
<i>LearnThingsFree.com</i> (2025): Developed a modern, community-driven platform with Next.js 14, TypeScript, and MongoDB, connecting users to free educational resources across the web, with real-time user interactions, server-side rendering, and robust authentication.
<i>City in a Forest - Trees Atlanta</i> (2024): Analyzed tree planting and survival trends using PostgreSQL, ArcGIS API, Python (pandas, PyProj). Published interactive dashboard and blog write-up of results.

LANGUAGES AND TECHNOLOGIES

Databases: Google BigQuery, PostgreSQL, MongoDB, SQL Server
BI & Analytics: Tableau, Microsoft Power Apps
Programming: Python (pandas, Matplotlib), REST APIs, TypeScript
